Description:

The SSI X-TLD Series is a variant of the standard TLD lifter used in the SSI Range In A Box (RIAB) System for simplicity and the widest range of use. The X-TLD offers distinct advantages to get to training faster:

- Less hardware to deploy and lower cost.
- Same rock-solid target lifter hardware as the RIAB System.
- Hit sensor allows use with live ammunition, SIMunitions, and airsoft.
- Uses quick-swap, long-lasting, common cordless tool batteries.
- Up to two days runtime with a 6Ahr battery.
- Simple, rechargeable hand-held controller.
- Adjust target options on-the-fly with the pocket-size controller.
- Stores last-used settings in memory.
- Best lift capability of ANY light-weight target system on the market with an effective wireless range of 500+ meters L.O.S.
- Tool-less connection of silhouettes and accessories.
- Dual-arm target lifter hardware for friend/foe training.
